NOTES:

() Number of Respondents

The effective placement rate consists of the employment rate (working full-time, part-time or military) plus the continuing education rate (out of the work force due to continuing education).

* Too few respondents to report

**** A significant change to the survey instructions was implemented beginning with the Class of 2016-17:**

-Degree completion dates were piped into the survey, and respondents were asked to provide their employment status exactly one year post-graduation. This change allows for more accurate calculation of one year placement and employment rates. Exercise caution when making cohort comparisons.

****Significant changes to the University's rate calculations were implemented with the Class of 2016-17:**

-Previously removed, alumni indicating "out of the workforce due to other reasons" are now included in all calculations and are labeled as "Not Seeking." This change aligns the University's placement and employment rates with the standards proposed by the National Association of Colleges and Employers (NACE). This new calculation will necessarily result in lower rates than the previous formula, but ERAU rates will be more comparable to those reported by institutions adhering to the NACE standards.

-Respondents with multiple degrees conferred within the academic year are counted for each degree they were awarded.
