Methodology

The Worldwide Alumni Survey is designed to capture and relay information on postgraduate outcomes. Item content is developed and managed by the Office of Institutional Research in consultation with Career Services Offices, College Deans, Department Chairs and Program Coordinators. Core questions assess similar constructs across all campuses and include educational goals, employment status, university/program satisfaction, general education skills, research skills and program-specific learning outcomes. Using an online platform, the Worldwide Alumni Survey is administered every spring. An email invitation is sent from the Office of Institutional Research followed by periodic reminder emails until data collection concludes early June. The following tables reflect the responses from the graduating class of 2017 (n= 1250, response rate = 39%).

~~XXXXXXXXXX~~

Rate Calculations:

This change aligns placement rate and associated calculations with the standards proposed by the National Association of Colleges and Employers (NACE). Previously removed. alumni indicating "out of the workforce due to other reasons" are now included in all calculations and are labeled as "Not Seeking". Percentages based on total survey respondents.

Survey Instructions:

Degree completion dates are piped into the survey, and respondents are asked to describe their employment status exactly one year post-graduation. This change allows for more accurate calculation of one year placement and employment rates.
