## Methodology

The WW Alumni Survey: 1-Year After Graduation - was administered using an online survey design. The survey was conducted in the Spring of 2015. Questions were developed by the Office of Institutional Research in consultation with Career Services Office, College Deans, Department Chairs, and Program Coordinators at the Worldwide Campus. Core questions, common throughout all surveys, addressed educational goals, current employment status, overall ERAU satisfaction, and acquired general education and research skills. Each college and program was given the opportunity to incorporate additional questions specific to their graduates. Additionally, program-specific items meant to address student learning outcomes were incorporated. The following tables reflect the responses from the graduating class of 2013 for the Worldwide Campus (n = 1178; response rate 31%).
