Source: Institutional Research. Unduplicated headcount of enrollment for the 12-month period, July-June.

Students are counted once, based on their status as of their first term of attendance during the period. Methodology changes: prior to 2020-21, status was instead based on the highest level (UG/GR) achieved during the period. Prior to 2019-20, results were originally reported based on the last term of attendance at the highest level, but were later revised (as shown here) to reflect the first term at that level.

Note: Some ethnicity results (prior to 2018-19) have been revised from those originally reported due to the later discovery of an error in the logic that applied the new logic described below (primarily affected the Hispanic/Latino, Two or More, and Unknown results).

Methodology: Students first self-identified themselves as Hispanic/Latino or not, then as one or more of the following: American Indian/Alaskan Native, Asian, Black/African American, Native Hawaiian/Pacific Islander (new), White. The results are summarized according to the following hierarchy (per federal reporting requirements):

1. Nonresident Alien, aka International Students (regardless of whether or not other categories were selected)
2. Hispanic/Latino (regardless of whether or not other categories were selected)
3. Each of the five ethnic categories (if only one was chosen)
4. Two or more races (if more than one of the five individual categories was chosen)
